IDA8 System for Voice Alarm and Background Music

UAP Audio System for Seminars and Banquets

The Modern Times Hotel with its sleek contemporary design and original decor is situated between the lake and mountains at the heart of the Vaudois Riviera. It is 4 star establishments, and its proximity to «Chaplin's World by Grévin». For business or vacation stays the hotel will meet all requirements and the hotel team will ensure that the stay is perfect. There are Restaurant, Bar, Rooms, Junior Suites and also Rooms for Seminars and Banquets.

REFERENCE

PROJECT OBJECTIVE

Project objective was to have a Voice Alarm System according to EN 54 which will be used on the same time also for background music. The request was also to have a separate audio system for Seminar and Banquet rooms.

PROJECT SOLUTION

Voice Alarm solution was been provided by IDA8 system and DPAfour amplifiers. Paging Console PSS-AS is configured for 7 paging zones, with an EVAC button for each or for all zones. Music sources can also be selected by PSS-AS. IDA8 matrix is connected to the KNX management system which is used in the whole hotel and background music is selected over KNX. IDA8 system is connected to the Fire Alarm central, but Evacuation can be started also manually from one deported Security-Push-Button. For the Seminar and Banquets rooms we provided a solution with UAPG2 8/8 matrix. IDA8 and UAP systems are connected to each other and in case of evacuation the UAP audio system will be muted automatically. Used loudspeakers are from our brand PENTON.
